Hi {{First Name}},

Ever spent half an hour (or more) writing a care plan that you wished could take five minutes?

With medical-grade AI, care plans and treatment plans can now be written in seconds, and checked by you.

MediQo automatically generates GPMPs, TCAs, treatment updates, and referral letters — personalised to each patient, fully editable, and export-ready.

Clinics save hundreds of admin hours every month.

• Book a demo: https://calendly.com/mediqo-support/30min
• Sign your clinic up for a free trial: https://calendly.com/mediqo-support/trial

Once you're set up, your templates auto-populate from real patient data — not manual typing.

Plus, the tools integrate with Best Practice, Halaxy, Cliniko, Nookal and more.

Share MediQo with your team. When care plans write themselves, your clinic runs smoother than ever.

All the best,
{{Your Name}}
