Hi {{First name}},

I'd like to recommend you take a look at MediQo — a full suite of medical AI tools designed to help practices reduce admin, improve care, and unlock new revenue streams instantly.

MediQo brings together everything a clinic needs in one platform:

• AI Phone Receptionists that book, update and cancel appointments, complete pre-consult triage, answer FAQs, and communicate in 110+ languages — all using the clinic's existing phone number.

• Smart MBS Billing with real-time item number suggestions based on clinical context, helping doctors stay compliant and eliminate under-billing.

• MBS Billing Audit that analyses 12+ months of data to recover missed income.

• Automated Patient Education Letters after every consultation, including treatment and dosage instructions.

• Instant clinical answers on patient cases and general medical queries, powered by national therapeutic guidelines and verified medical sources.

• Integrated Telehealth & Documentation AI including real-time AI-scribing (even with headsets), care plan generation, and seamless PMS syncing.

If you're looking to increase revenue, improve efficiency and reduce workload, this is one of the most impactful tools I can recommend.

• Book a demo: https://calendly.com/mediqo-support/30min
• Sign your clinic up for a free trial: https://calendly.com/mediqo-support/trial

I'm confident you'll be impressed by how much time and revenue MediQo can save.

Best regards,
{{Your Name}}
